

Meeting Notes 4/11/24

- Restructured database to prepare for transitioning development towards adding groups
 - Users, Portfolios, Groups, Stocks
- Got API to work functionally and display in portfolio
- Went over Lab 11 / Testing Completion and started planning for future testing statements
- Completed goal of implementing API for managing individual portfolio
- Decided not storing stocks in database, will only use stock symbols to reference finnhub stocks
- Added security to register so that empty username is not possible through frontend
- Organized Github board
